Thinking of breeding your cat?

Be prepared - Time, money, space and commitment

Vet check first - Know the risks and responsibilities

Health matters - Screen for diseases and avoid exaggerated features

Don't overbreed - Maximum of **6 litters** between the age of **1 and 6 years**

Home, not cages - Cats need the right environment

Prevent surprises - Neuter at **4 months** if not breeding

Kitten care - Wean at **3-4 weeks**, vet check at **3 weeks**

Socialise early - Kittens should be confident and friendly

Find responsible owners - Use the **Kitten Checklist**

Know the law - Kittens must be **8+ weeks** to sell. You may need a licence

Breeding is a big responsibility - talk to your vet first!
